

Real-time compliance checks on all prescription transactions prior to dispensing.

There are countless prescribing laws across the United States that are affecting the prescription claims process. From the independent authority to prescribe, to the growing restrictions on prescribing controlled substances, the rules are becoming more complex at the federal and state level.

With so much potential for change and increased scrutiny from regulators, third parties, and the media, it has become a costly operational challenge to maintain a reliable system that incorporates updated information about prescribers and the regulations that affect your business.

The regulatory environment and variations across prescribers, specialties, and state boards, has made validating a prescription a huge operational risk. That's why LexisNexis®, engineered VerifyRx™ to perform real-time compliance checks on all prescription transactions before they are transmitted to payers, helping pharmacy chains reduce regulatory risk and increase the percentage of paid prescription claims.

VerifyRx processes millions of transactions per day, leveraging the power of the LexisNexis HPCC® Systems proprietary supercomputing platform for big data and analytics that enables fast and accurate access to vital intelligence. HPCC Systems automatically updates reference information such as provider enrollment, DEA and state data (when available), Office of the Inspector General (OIG) sanctions and taxonomy. In addition, HPCC Systems allows for seamless integration with adjudication platforms and eliminates latency introduced with file delivery systems.

Real Time Big Data & Analytics Platform

driven by HPCC Systems®

Instant Audit Defense

- All transaction data and configuration changes logged in real-time
- Traceability to state and federal source data for each transaction
- Monitoring and reporting of compliance performance

Reliable Framework - HPCC® Systems

- Industry leading technologies, leveraging widely accepted open-source infrastructure
- Sub-second response times enabling near real-time input
- High availability architecture
- Fully scalable environment

Highly Configurable to Meet Legal, Compliance, and Business Needs

- State and Federal Prescriptive Authority at the taxonomy and credential level
- Federal and State sanctions data
- DEA and State license status
- Grace period allowance
- Configure reject, warn, or capture responses by check

Access to the Timeliest Data Available

- Daily updates to DEA and State data (when available) compared to the standard weekly NTIS file and longer more normal frequencies

Audit Defense

Users can easily look up a prescriber being audited and instantly drill down into specific transactions complete with details at the state and federal level. VerifyRx can quickly trace credential data and historical values for rapid research and resolution thus reducing the risk of costly fines and reputation damage.

Configuration at the State, Federal and Custom Level

- Prescriptive Authority
- Sanctions Data
- DEA and State License status
- Grace period allowance
- Reject, warn or capture messaging for over 50 checks

Administrative Reporting and Monitoring

VerifyRx has powerful reporting capabilities that are highly configurable so clients can look at specific criteria in their efforts to reduce risk across store locations.

Designed especially for Pharmacy and PBM, VerifyRx has become a widely used and vital component of compliance risk mitigation strategies. The VerifyRx solution has been designed from the ground up to be a highly configurable and responsive compliance-based validation solution that identifies potential claims submission errors prior to dispensing.

About LexisNexis® Risk Solutions

LexisNexis Risk Solutions (www.lexisnexis.com/risk/) is a leader in providing essential information that helps customers across industries and government predict, assess and manage risk. Combining cutting-edge technology, unique data and advanced analytics, Risk Solutions provides products and services that address evolving client needs in the risk sector while upholding the highest standards of security and privacy. LexisNexis Risk Solutions is part of Reed Elsevier, a leading global provider of professional information solutions across a number of sectors.

Our health care solutions assist payers, providers and integrators with ensuring appropriate access to health care data and programs, enhancing disease management contact ratios, improving operational processes, and proactively combating fraud, waste and abuse across the continuum.

Health Care

LexisNexis® VerifyRX™ does not constitute a “consumer report” as that term is defined in the federal Fair Credit Reporting Act, 15 USC 1681 et seq. (FCRA). Accordingly, VerifyRX™ does not be used in whole or in part as a factor in determining eligibility for credit, insurance, employment or another permissible purpose under the FCRA. Due to the nature of the origin of public record information, the public records and commercially available data sources used in reports may contain errors. Source data is sometimes reported or entered inaccurately, processed poorly or incorrectly, and is generally not free from defect. This product or service aggregates and reports data, as provided by the public records and commercially available data sources, and is not the source of the data, nor is it a comprehensive compilation of the data. Before relying on any data, it should be independently verified. LexisNexis and the Knowledge Burst logo are registered trademarks of Reed Elsevier Properties Inc., used under license.
