

More than 40% of provider records have missing information.¹
Fill the gaps with current and comprehensive provider data from LexisNexis®.

LexisNexis® Provider Data Enhancements

Health Care

Get better results with correct, current and comprehensive health care provider information.

Provider information is constantly changing. With physicians and other providers moving and working from multiple locations, more than 25% of provider demographic information changes each year.¹ The result: more than 40% of provider records have missing or inaccurate information.¹ To help payers address the provider data challenge, LexisNexis® has created a continuum of provider data assets and analytics called the Provider Data Intelligence Suite.

The second step in this continuum is LexisNexis Provider Data Enhancements. This proven, powerful and hosted solution gives you a systematic way to keep provider information accurate and up-to-date while significantly reducing operating costs.

Provider Data Enhancements makes use of traditional and non-traditional data sources, and uses sophisticated analytical software to identify, de-duplicate, validate, update and augment internal payer data with critical pieces of information like addresses, phone numbers, emails, affiliations and much more.

The Provider Data Intelligence Suite delivers unrivaled depth, breadth and quality of information in a way that is easy for you to integrate and use. Customers across the health care industry have come to depend on LexisNexis for information that is:

CORRECT: We deliver only the highest quality health care provider information by blending thousands of data sources, sophisticated analytics and health care expertise.

CURRENT: Our unique and proprietary methodologies help provide reliable, up-to-date information by continually improving the LexisNexis Provider Data MasterFile and the analytical science used to create it—and systematically verifying provider data by phone, fax and email.

COMPREHENSIVE: Provider Data Enhancements provides a wide array of information—demographics, key identifiers including NPI numbers and credentials, and board certification information about all types of health care providers including doctors, dentists, chiropractors, physical therapists, facilities, labs, pharmacies and others.

LexisNexis® Provider Data Intelligence Suite

Be confident your operations team has the information they need

Only LexisNexis delivers all the information you need to know about your providers and enables you to manage its integration so you know that your information is accurate, up-to-date and properly integrated into your operations.

LexisNexis Provider Data Enhancements cleans and enhances your provider files with information from our Provider Data MasterFile, which runs through our proprietary linking algorithms that allow us to leverage thousands of referential and transactional data sources. Our linking technology uses advanced analytical and database methods to efficiently and reliably standardize, match and join data from different sources, and then produce a provider profile that contains the best available information.

When LexisNexis receives your provider file, it cleanses the file—identifying and replacing inaccurate, duplicate and incomplete records. It also augments the file with additional data attributes.

Our data scientists work with you to establish business rules that govern what updates, corrections and augmentations happen automatically, and where your staff's expertise will come into play. After those rules are applied, Provider Data Enhancements delivers a clean provider file ready for easy integration into your systems.

More payers trust LexisNexis than any other provider information solution

BREADTH OF DATA

Covering all health care provider types and corporate entities

More than 8.5M provider records tracked:

- 1M+ Physicians with active locations
- 3.5M RN/LPNs

LexisNexis® Provider Data Enhancements does not constitute a "consumer report" as that term is defined in the federal Fair Credit Reporting Act, 15 USC 1681 et seq. (FCRA). Accordingly, Provider Data Enhancements may not be used in whole or in part as a factor in determining eligibility for credit, insurance, employment or another purpose in connection with which a consumer report may be used under the FCRA. Due to the nature of the origin of public record information, the public records and commercially available data sources used in reports may contain errors. Source data is sometimes reported or entered inaccurately, processed poorly or incorrectly, and is generally not free from defect. This product or service aggregates and reports data, as provided by the public records and commercially available data sources, and is not the source of the data, nor is it a comprehensive compilation of the data. Before relying on any data, it should be independently verified.
